The I-710 Livability Initiative is being led by the Gateway Cities Council of Governments (GCCOG) and Metro, it includes planning efforts for: improving transportation options, LA River/watershed management, streetscape enhancements, parks/open space, public art, and health. In support of the GCCOG’s Initiative, Metro applied for and received a $500,000 Caltrans Sustainable Transportation Planning Grant to complete a plan for Complete Streets and Active Transportation improvements within the I-710 Corridor.

**Project Scope**

- Review of existing plans, documents, and conditions in the study area
- Coordination with key stakeholders such as the I-710 committees, individual cities, residents, community groups, and others to establish goals and areas of focus
- Review challenges and options for Complete Streets improvements on streets within one mile from I-710, including conceptual improvement plans, where feasible
- Identify and develop bike and pedestrian safety enhancement plans, within a ¼ mile of I-710, if they are not already part of the Complete Streets element of this plan
- Evaluate other possible enhancements to multimodal mobility, access, safety, and connectivity within the I-710 Corridor
- Conduct community and stakeholder outreach through community workshops and stakeholder interviews
- Develop conceptual plans and cost estimates for key projects with potential phasing and implementation of improvements

**Project Goals**

- Enhance comfort, safety, and mobility for all roadway users
- Provide implementable strategies for complete streets
- Develop improvements for streetscapes along key corridors

**Schedule**

- Project Start Date: August 2017, with Completion of August 2018
