8 PUBLIC AND AGENCY INVOLVEMENT

Pursuant to the requirements of CEQA and NEPA, the Authority and the FRA as lead agencies have conducted a public and agency involvement program as part of the program environmental review process. This chapter describes the public and agency involvement efforts conducted in the preparation of this Program EIR/EIS. The public and agency involvement program included the following efforts.

- Public involvement and outreach—informational materials, including region-specific fact sheets; information and scoping meetings including town hall meetings; public and agency scoping meetings, meetings with individuals and groups, presentations and briefings.
- Agency involvement—agency scoping meetings, interagency working group, other agency consultation.
- Notification and circulation of the Program EIR/EIS.

8.1 PUBLIC INVOLVEMENT AND OUTREACH BEFORE DRAFT PROGRAM EIR/EIS RELEASE

8.1.1 Public Information

A. MAILING LIST

A mailing list database was developed and used to provide information and announcements concerning the preparation of the Program EIR/EIS to the public. The database was based on an existing Authority contact list and includes more than 15,500 entries of federal, state, and local agency representatives; elected officials; property owners; interested persons; and interested organizations. The mailing list was updated to include public meeting participants and others who asked to be added. This list was used to provide notification of scoping events. The mailing list does not represent the distribution list for the Program EIR/EIS, which is presented in Chapter 11.

B. PUBLICATIONS AND MATERIALS

During the scoping phase, fact sheets were developed on various topics. The general fact sheet regarding scoping meetings was translated into Spanish and Chinese. Individual fact sheets covering the following general topics were compiled.

- Dates and agendas of scoping meetings.
- Role and responsibilities of the California High Speed Rail Authority.
- Project description.
- Project purpose and need and objectives, and project alternatives.
- Preliminary alignment and station options in the five regions.
- Types of high-speed trains being considered.
- Typical cross sections of high-speed train alternatives.
- Environmental review process.
- Environmental issues and technical studies.
- Visual and aesthetic resources potentially affected by the project.
- Noise and vibration, resources potentially affected by the project.
C. CALIFORNIA HIGH SPEED RAIL AUTHORITY WEB SITE

During the program environmental review process, project information and announcements have been posted on the Authority's Web site (www.cahighspeedrail.ca.gov). The Authority uses the Web site to make public documents widely available. The site includes information on high-speed trains, a proposed route map from the Authority's final business plan (California High Speed Rail Authority 2002), newsletters, press releases, board of director meeting information, recent developments and new information regarding status of the environmental review process ("What's new?"), information to contact the Authority, and related links. The scoping reports and the alternatives screening reports and public materials, in addition to other reports, have also been made available on the Web site. The Web site is generally updated monthly.

8.1.2 Public Meetings

The Authority and the FRA held both informal and formal public meetings during the EIR/EIS preparation process. Various meeting formats (e.g., open house, formal presentation, and question and comment session) were used to present information and provide opportunities for input by participants. Numerous briefings, presentations, and small group meetings were included in the process. (See Chapter 9, Organization, Agency, and Business Outreach, for a list of meetings in addition to those noted here.) There were four general categories of public meetings: town hall meetings, public and agency scoping meetings, Authority governing board meetings, and presentations and briefings to interested groups.

A. TOWN HALL MEETINGS

Fifteen informal town hall meetings were held between February 5, 2001 and March 29, 2001, to inform the public about the EIR/EIS preparation process and the subsequent more formal public and agency scoping process. The town hall meetings included a presentation on the proposed HST system and alternatives, the environmental review process, and ways to participate in the Program EIR/EIS preparation process, along with a question-and-answer session with Authority staff and consultants. Meetings were announced through direct mail, a press release, and an announcement posted on the Authority’s Web site. Approximately 538 people attended the town hall meetings. A summary of the meetings and input received is presented in Outcome Report: Town Hall Meetings—August 1, 2001. The places and dates of the town hall meetings are listed below.

- California State University, Sacramento—February 5, 2001.
- California State University, Hayward—February 8, 2001.
- California State University, Stanislaus—February 12, 2001.
- California State University, Fresno—February 15, 2001.
- San Jose State University—February 15, 2001.
- California State University, Bakersfield—February 26, 2001.
- Palmdale City Hall—March 1, 2001.
- California State University, Northridge—March 5, 2001.
- California State University, Los Angeles—March 8, 2001.
- California State University, Fullerton—March 12, 2001.
- California State Polytechnic University, Pomona—March 15, 2001.
B. PUBLIC AND AGENCY SCOPING MEETINGS

Seventeen public and agency scoping meetings were held between April 25, 2001 and May 23, 2001. In most locations, one meeting was conducted during the day and one during the evening to accommodate agency representatives and the general public. Meetings generally began with an informal open house and exhibit display followed by a presentation and comment session. Comments were documented and are summarized below by region and in the Final Statewide Scoping Report, December 14, 2001. Agendas, fact sheets, and scoping period comment sheets were provided. The federal notice of intent was published in the Federal Register on May 2, 2001, and the state notice of preparation was issued on April 6, 2001. Direct mail announcements of the public scoping meetings were sent to the 15,500 persons listed in the database, and the scoping meetings were announced on the Authority’s Web site. Approximately 400 people participated in the formal scoping meetings. The places and dates of the public and agency scoping meetings are listed below.

- Sacramento: State Resources Building—April 24, 2001, 1:00 p.m. to 3:30 p.m.
- Oakland: Oakland City Hall—April 25, 2001, 11:00 a.m. & 6:00 p.m.
- Bakersfield: Kern County Administration Building—April 30, 2001, 3:00 p.m. & 6:00 p.m.
- Los Angeles: Japanese/American National Museum—May 2, 2001, 4:00 p.m. & 6:30 p.m.
- Fresno: Fresno City Hall—May 7, 2001, 3:00 p.m. & 6:00 p.m.
- Riverside: Riverside Convention Center—May 8, 2001, 6:30 p.m.
- San Diego: San Diego Association of Governments—May 10, 2001, 2:30 p.m., University Towne Centre, 6:00 p.m.
- Modesto: Modesto City/County Admin. Bldg.—May 14, 2001, 3:00 p.m. & 6:00 p.m.
- San Jose: Berger Drive Facility, Auditorium—May 15, 2001, 1:30 p.m. & 6:00 p.m.
- Irvine: Irvine Civic Center—May 23, 2001, 3:00 p.m. & 6:00 p.m.

In addition to the formal scoping meetings, other presentations, briefings, and workshops were held during the scoping process. Workshops were attended primarily by public agencies and other representative local organizations. Notification of the workshops was provided by telephone and fax to local/regional agency and organization representatives. Chapter 9, Persons and Organizations Contacted, includes a list of the additional meetings held as part of the Authority’s outreach effort, both during and subsequent to scoping. Comments from these scoping workshops and meetings are summarized in the Scoping Reports, July 2001 for each of the five regions (Bay Area to Merced, Sacramento to Bakersfield, Bakersfield to Los Angeles, Los Angeles to San Diego via Inland Empire, and Los Angeles to San Diego via Orange County).

C. CALIFORNIA HIGH SPEED RAIL AUTHORITY BOARD MEETINGS

The Authority governing board typically holds monthly meetings. Board meetings are held in different locations to encourage participation from agencies and the general public in multiple areas of the state. The board meetings held during the program environmental review process regularly included status reports on the preparation of the Program EIR/EIS and provided opportunities for public comment. Authority board meetings are announced by posting on the Authority’s Web site and by mailing to approximately 1,600 persons and organizations. Board meeting minutes are also
posted on the Web site. The places and dates of the meetings of the Authority’s board meetings are listed below.

- San Jose—August 1, 2001.
- San Diego—February 20, 2002.
- San Francisco—March 20, 2002.
- San Bernardino—April 17, 2002.
- San Jose—July 17, 2002.
- Fresno—August 21, 2002.
- Los Angeles—September 18, 2002.

D. PRESENTATIONS, BRIEFINGS, AND OUTREACH

During the program environmental review process, presentations to conferences, forums, local and regional government agencies, interest groups and organizations, as well as agency meetings and other briefings, have been conducted to provide general information concerning the proposed HST system and the program environmental review process. Interest groups included non-governmental organizations (e.g., the Sierra Club), community planning organizations (e.g., San Francisco Planning and Urban Research Association [SPUR]), and public interest discussion/research groups (e.g., Los Angeles Town Hall). The state, regional, and local groups that participated in this aspect of the Authority and FRA outreach effort are listed in Chapter 9.
8.2 AGENCY CONSULTATION BEFORE DRAFT PROGRAM EIR/EIS RELEASE

8.2.1 Agency Scoping
In addition to the statewide scoping meeting held in Sacramento on April 24, 2001, scoping meetings and informal roundtable/workshop meetings were conducted with many public agencies. Many of the agency contacts made during the scoping process led to subsequent one-on-one and small group agency consultation meetings during the preparation of the Program EIR/EIS.

8.2.2 Interagency Consultation
The Authority and the FRA convened staff representatives from 27 interested federal and state agencies to provide input on the environmental review process. Six federal agencies (U.S. Environmental Protection Agency [EPA], U.S. Army Corps of Engineers [USACE], Federal Aviation Administration [FAA], Federal Transit Administration [FTA], Federal Highway Administration [FHWA], and U.S. Fish and Wildlife Service [USFWS]) were designated cooperating agencies under NEPA for the preparation of the Program EIR/EIS, as reflected in a memorandum of understanding among these agencies and the FRA. There were nine consultation meetings: April 24, 2001; September 26, 2001; May 8, 2002; June 26, 2002; September 12, 2002; December 17, 2002; March 12, 2003; May 28, 2003; and July 23, 2003.

The federal cooperating agencies and the lead agencies also met on six occasions: May 8, 2002; September 12, 2002; December 17, 2002; March 11, 2003; May 28, 2003; and July 23, 2003.

8.2.3 Other Agency Consultation
In addition to the scoping process and interagency staff meetings, agency consultation has taken place at the state and regional levels. For example, the Authority participated in a workshop hosted by the San Diego Area Governments (SANDAG), which a number of regional jurisdictions attended. Chapter 9, Organization, Agency, and Business Outreach, lists these additional briefings.

The Authority met with staff of the State Historic Preservation Office on October 23, 2002 to define the area of potential effect for the archaeology and historic property evaluation and to discuss the method of analysis proposed for this Program EIR/EIS.

The FRA and the Authority also initiated consultation with the Native American Heritage Commission for a search of their Sacred Lands file and lists of Native American contacts. The contacts were sent letters providing information about the proposed project alternatives and requesting information about any traditional cultural properties that could be affected by the project. The Authority also met with tribal representatives on September 9, 2003, at Frazier Park in the Tehachapi Mountains, on September 10, 2003, at the San Luis Recreation Area in Gustine, and on October 9, 2003, at the Temecula Community Center.

8.3 SCOPING SUMMARY
The scoping process helped the lead agencies identify general environmental issues to be addressed in this Program EIR/EIS. The public and agency comments identified support for and interest in the proposed high-speed train system in the general corridors to be studied, and indicated the need for the proposed system to be connected to existing transportation systems. Providing potential freight service was also frequently mentioned. Concerns regarding environmental issues typically focused on potential
noise and visual impacts, safety issues, potential impacts on air quality and sensitive habitats, and the potential for growth inducement. In addition to these issues, comments and concerns specific to each region are summarized below.

8.3.1 Bay Area to Merced

In the East Bay and Peninsula corridors, comments suggested the need to consider improving existing passenger rail services in existing corridors with compatible/consistent technologies versus adding new dedicated rights-of-way and services. Support was expressed for station locations at the proposed new Transbay Terminal in San Francisco and in downtown Oakland. The comments identified the need for the project to be sensitive to such environmental issues as noise, visual impacts, safety, impacts on wildlife refuges, and effects of induced growth. Concerns were raised regarding train speeds in urban areas. Some comments suggested including Altamont Pass in the study.

8.3.2 Sacramento to Bakersfield

Generally, the public and agency comments on an HST system in the Central Valley identified strong support for using existing rail corridors as much as possible to minimize disruption in the urban cores, as well as to minimize impacts on agricultural lands in the Central Valley. Many comments indicated a greater need for high-speed rail in the Central Valley than in other areas of the state because of limited air service into and out of the Central Valley cities. The most frequently mentioned environmental issues were preserving agricultural lands, contributing to improved air quality, and limiting potential impacts on future growth patterns.

8.3.3 Bakersfield to Los Angeles

The majority of those commenting on the HST system in this region viewed the Palmdale alignment (either through the Palmdale airport or the Transportation Center) as the preferred alignment. The I-5/Grapevine alignment was less preferred because of the extensive tunneling proposed, the seismic instability in the area, and the costs and uncertainty associated with tunnel construction. Comments expressed concern over the possible effects of the project, including adverse impacts on surrounding land uses, recreational areas, and agricultural lands, as well as general safety issues.

8.3.4 Los Angeles to San Diego via Inland Empire

In the inland corridor, two different lines of comments were presented: that the alignments should focus on corridors with the densest population, and that the alignments should focus on open land areas where greater opportunities for growth and development may exist. Comments from agencies indicated a concern that proposed stations should be located where transit-oriented land use, accessibility, and parking needs could be accommodated. Many comments suggested that this inland corridor should be connected to downtown San Diego. Comments pertaining to environmental concerns focused on visual impacts, impacts on floodplains/wetlands and sensitive habitats, noise impacts, traffic impacts, and possible growth-inducing impacts.

8.3.5 Los Angeles to San Diego via Orange County

Public and agency views on the relationship of high-speed trains and connectivity to LAX were varied and conflicting as to whether this would relieve or increase development pressures at LAX. Concerns about the existing LOSSAN rail corridor (south of Irvine) focused on the need to improve existing services rather than add new dedicated rights-of-way and services. Comments suggested the I-15 corridor would be better suited to dedicated high-speed services. Many comments from communities south of Irvine identified support for grade separation, but concerns were raised over the potential impacts of 200-mph train speeds on the existing communities along the LOSSAN corridor. Comments on environmental issues focused on potential visual, air quality, and noise impacts; compatibility with existing and planned land
uses; impacts on sensitive lagoon and wetland areas; and safety. The potential impacts of an overhead catenary power supply system on views along the coast were noted. Impairment of or impacts on recreational facilities, or access to these facilities, was also raised as a concern.

8.4 Notification and Circulation of the Draft Program EIR/EIS

Notice regarding the availability and the circulation of this Draft Program EIR/EIS were provided pursuant to CEQA and NEPA requirements. The Draft Program EIR/EIS was released for public review and comment on January 27, 2004 and noticed in the federal register on February 13, 2004. The initial public comment period was scheduled to end May 14, 2004, but due to public requests, it was extended to August 31, 2004. Responsible agency and the public oral and written comments submitted by August 31, 2004 will be addressed and responded to in the Final Program EIR/EIS.

Notification packets announcing the availability of the Draft Program EIR/EIS were mailed on February 6, 2004 to federal cooperating agencies, other affected agencies and elected officials. The federal cooperating agencies received an announcement letter from the Authority, a hard copy of the Draft Program EIR/EIS, and a CD copy of the document with appendices. 140 other affected public agencies received an announcement letter from the Authority, an Executive Summary and a CD copy of the document with appendices. 282 elected officials received an announcement letter from the Authority, a Summary Brochure and a CD copy of the document with appendices. A distribution list for the Draft Program EIR/EIS is provided in Chapter 11.

To further publicize the release of the draft environmental document, press briefings were held in San Francisco, Los Angeles and Fresno. The Authority Board Chairperson, Joseph Petrillo, provided an overview of the project and the Draft Program EIR/EIS. Public Officials from each region made remarks expressing their views on the proposed project. Several media representatives attended each briefing.

The general public was informed of the Draft Program EIR/EIS release through distribution of an announcement of the document’s availability to the project mailing list. The announcement also provided the details for submitting comments by mail or fax and announced that public hearings will be held in the future. The mailing list contains approximately 10,000 statewide contacts including: federal, state, and local elected officials; federal, state and local agency representatives; chambers of commerce; environmental and transportation organizations; special interest groups; media; private entities; and members of the public. The mailing list is based on the database developed during the scoping phase. The mailing list is on file with the Authority and is available for viewing.

The Program EIR/EIS was also made available for viewing and downloading at the Authority’s website, www.cahighspeedrail.ca.gov. Comments were accepted directly from the website as well. The website also provided the opportunity to request a CD ROM of the document.

The announcement and website listed the 32 statewide libraries with a hard copy of the document available for review. Participating libraries were located in the following cities: Anaheim, Bakersfield, Burbank, Escondido, Fremont, Fresno, Gilroy, Irvine, Los Angeles, Merced, Modesto, Mountain View, Norwalk, Oakland, Oceanside, Ontario, Palmdale, Palo Alto, Riverside, Sacramento, San Clemente, San Diego, San Francisco, San Gabriel, San Jose, Santa Clarita, Stockton, Sylmar, Temecula, and Tulare.

The release of the Draft Program EIR/EIS was also announced through a display ad distributed in 16 statewide newspapers. The display ads were published on Friday, February 13, 2004 in the following newspapers: Sacramento Bee, Daily Republic, Oakland Tribune, San Francisco Chronicle, San Jose Mercury, Modesto Bee, Merced Sun Star, Fresno Bee, Bakersfield Californian, Los Angeles Times, Orange County Register, Antelope Valley Press, The Press-Enterprise, North County Times, San Diego Tribune, and Stockton Record.
The Authority held a total of seven public hearings to present the Draft Program EIR/EIS and to receive public comments. Originally, five public hearings were scheduled, but with the extension of the public comment period to August 31, 2004, two more public hearings were planned. A court reporter was present at each of the public hearings to record oral comments. At each public hearing, oral comments could be made during the “public testimony” portion of the meeting or during the open house portion of the meeting to the court reporter at the “public comments” table. Oral comments on the Draft EIR/EIS were only accepted during the seven public hearings.

The public was notified of the first five public hearings through an announcement that provided the public hearing locations and schedule. The announcement was mailed on March 12, 2004 to the project mailing list (list is described in the “Document Availability” section).

The two additional public hearings were announced through a Notice Postcard mailed on May 13, 2004 to the project mailing list.

The public hearings were also announced through a second display ad distributed in 16 statewide newspapers. The display ad for the first five public hearings was published on Friday, March 19, 2004 and the ad for the two additional public hearings on May 10 and 12. The same newspapers were used as with the Notice of Availability display ad (listed in the “Document Availability” section).

Each of the five initial public hearings started at 3:00 PM and ended at 8:00 PM. The hours were selected to facilitate participation by the public. From 3:00 to 4:00 PM there was an informational open house with exhibit boards available for viewing and project staff present to answer questions and discuss issues. Formal public testimony began at 4:00 PM. Authority Board Chairperson Joseph Petrillo, facilitated the public testimony. Other Board Members, Mehdi Morshed, Executive Director of the Authority and David Valenstein, FRA Representative (at selected meetings only) were present to listen to comments. The open house resumed once all public testimony was received.

The public hearings were scheduled as follows:

Sacramento – Tuesday, March 23, 2004
Los Angeles – Tuesday, April 13, 2004
San Francisco – Thursday, April 15, 2004
San Diego – Tuesday, April 20, 2004
Fresno – Wednesday, April 28, 2004

The two additional public hearings were held from 1:00 PM to 3:00 PM, all of which was public testimony. Exhibit boards were available and project staff present to answer questions and discuss issues. Chairperson Joseph Petrillo facilitated the public testimony and other Board Members and Mehdi Morshed were present to listen to comments.

The two additional public hearings were scheduled as follows:

San Jose – Wednesday, May 26, 2004
Los Angeles – Wednesday, June 23, 2004

At each public hearing, speaker cards were available for public testimony. Individuals, who wished to testify, submitted a speaker card and were then called in turn by the facilitator. Individual comments were time limited to provide equal opportunity for all to comment. A court reporter was present and recorded all the oral comments. Individuals were also able to make oral comments directly to the court reporter once the public testimony session had ended. Comment sheets were available for submitting written comments.
Public Hearing Summary

The Authority held a total of seven public hearings to present the Draft Program EIR/EIS and to receive public comments. Originally, five public hearings were scheduled, but with the extension of the public comment period to August 31, 2004, two more public hearings were planned. A court reporter was present at each of the public hearings to record oral comments. At each public hearing, oral comments could be made during the "public testimony" portion of the meeting or during the open house portion of the meeting to the court reporter at the "public comments" table. Oral comments on the Draft EIR/EIS were only accepted during the seven public hearings.

Public Hearing Notification

The public was notified of the first five public hearings through a Notice Announcement that provided the public hearing locations and schedule. The Notice Announcement was mailed on March 12, 2004 to the project mailing list (list is described in the "Document Availability" section).

The two additional public hearings were announced through a Notice Postcard mailed on May 13, 2004 to the project mailing list.

The public hearings were also announced through a second display ad distributed in 16 statewide newspapers. The display ad for the first five public hearings was published on Friday, March 19, 2004 and the ad for the two additional public hearings on May 10 and 12. The same newspapers were used as with the Notice of Availability display ad (listed in the "Document Availability" section).

Initial Five Public Hearings

Each of the five initial public hearings started at 3:00 PM and ended at 8:00 PM. From 3:00 to 4:00 PM there was an informational open house with exhibit boards available for viewing and project staff present to answer questions and discuss issues. Formal public testimony began at 4:00 PM. Authority Board Chairperson Joseph Petrillo, facilitated the public testimony. Other Board Members, Mehdi Morshed, Executive Director of the Authority and David Valenstein, FRA Representative (at selected meetings only) were present to listen to comments. The open house resumed once all public testimony was received.

The public hearings were scheduled as follows:
Sacramento - Tuesday, March 23, 2004
Los Angeles - Tuesday, April 13 2004
San Francisco - Thursday, April 15, 2004
San Diego - Tuesday, April 20, 2004
Fresno - Wednesday, April 28, 2004

Additional Two Public Hearings

The two additional public hearings were held from 1:00 PM to 3:00 PM, all of which was public testimony. Exhibit boards were available and project staff present to answer questions and discuss issues. Chairperson Joseph Petrillo facilitated the public testimony and other Board Members and Mehdi Morshed were present to listen to comments.

The two additional public hearings were scheduled as follows:
San Jose - Wednesday, May 26, 2004
Los Angeles - Wednesday, June 23, 2004
At each public hearing, speaker cards were available for public testimony. Individuals, who wished to testify, submitted a speaker card and were then called in turn by the facilitator. Individual comments were time limited to provide equal opportunity for all to comment. A court reporter was present and recorded all the oral comments. Individuals were also able to make oral comments directly to the court reporter once the public testimony session had ended. Comment sheets were available for submitting written comments.

**Public Hearing Overview**

Sacramento - Tuesday, March 23, 2004, 3:00 - 8:00 PM
- Location: Tsakopoulos Library Galleria, East Meeting Room, 828 I Street, Sacramento
- Individuals Signed In: 75
- Oral Testimony Speakers: 26
- Comment Sheets Submitted: 8

Los Angeles - Tuesday, April 13, 2004, 3:00 - 8:00 PM
- Location: Metropolitan Transportation Authority, 1 Gateway Plaza, Los Angeles
- Individuals Signed In: 90
- Oral Testimony Speakers: 16
- Comment Sheets Submitted: 8

San Francisco - Thursday, April 15, 2004, 3:00 - 8:00 PM
- Location: State of California Building, 455 Golden Gate Avenue, San Francisco
- Individuals Signed In: 64
- Oral Testimony Speakers: 46
- Comment Sheets Submitted: 16

San Diego - Tuesday, April 20, 2004, 3:00 - 8:00 PM
- Location: San Diego Association of Governments, 401 B Street, San Diego
- Individuals Signed In: 34
- Oral Testimony Speakers: 10
- Comment Sheets Submitted: 4

Fresno - Wednesday, April 28, 2004, 3:00 - 8:00 PM
- Location: City of Fresno Council Chambers, 2600 Fresno Street, Fresno
- Individuals Signed In: 58
- Oral Testimony Speakers: 21
- Comment Sheets Submitted: 1

San Jose - Wednesday, May 26, 2004, 1:00 - 3:00 PM
- Location: County Government Center, 70 West Hedding Street, San Jose
- Individuals Signed In: 90
- Speaker Cards Submitted: 58
- Comment Sheets Submitted: 4

Los Angeles - Wednesday, June 23, 2004, 1:00 - 3:00 PM
- Location: Metropolitan Transportation Authority, 1 Gateway Plaza, Los Angeles
- Individuals Signed In: 53
• Oral Testimony Speakers: 13
• Comment Sheets Submitted: 1

In all, over 450 members of the public attended the public hearings, 190 people provided oral testimony and 42 written comments were submitted.

Written Comments Sent

Written comments were sent to the Authority in the form of letters, faxes, and postcards and were also sent through the Authority’s website. The Authority has addressed comments received on the Draft Program EIR/EIS and the responses are included in Volume II. The following lists the comments (number of letters, postcards, and website comments) received. These counts represent the number of submittals received. Some of the letters received listed multiple agencies. In addition, a number of individuals and organizations also orally commented at the public hearings and/or commented both in hardcopy and electronically (through the website).

Letters (Letters/Faxes) Received: 333 total (4 from Federal Agencies, 5 from Federal Representatives, 10 from State Agencies, 4 from State Representatives, 83 from Local Agencies, 84 from Organizations, and 143 from Individuals).

Postcards: 1,411 total (both during and prior to comment period). 456 during comment period (172 of postcard #1, and 284 of postcard #2); 955 prior to comment period (all of postcard #1)

Website: 219 total (6 from local agencies, 9 from organizations, and 204 from individuals)

Overview of Comments Received

The brief summary below provides an overview of the post cards, written letters, comments submitted via the Authority’s website, and oral testimony received at the public hearings during the comment period. A complete summary of comments will be included in the Final Program EIR/EIS. Many of the comments supported the concept of a statewide HST system, however disapproval of the project was also expressed in some comments. Most of the comments either favored one HST design option (alignments and/or station locations) over another or favored the inclusion or exclusion of certain design options. Concerns were raised about potential environmental impacts from the construction and operation of HST service. Many concerns about environmental impacts comments dealt with local alignment options, but some of the comments also concerned the potential for the HST system to induce growth. Several environmental organizations questioned the adequacy and detail of the Program EIR/EIS. The following bullets summarize some of the most common comments received:

• Support for a HST system linking California’s major metropolitan areas.
• Opposition to HST alignment options through Henry Coe State Park.
• Support for the investigation of the Altamont Pass as an HST alignment option between the Central Valley and the Bay Area.
• Support for the Antelope Valley HST alignment (with a station at Palmdale) for crossing the Tehachapi Mountains between Central Valley and Los Angeles.
• Questions about the sufficiency of the Program EIR/EIS to meet CEQA and NEPA requirements because of a perceived lack of detail and/or design options excluded (primarily concerning the Altamont Pass).
• Support and opposition for specific alignment options between the Bay Area and Central Valley (Pacheco Pass and Diablo Range Northern Crossing option).
• Opposition to alignment options and concerns about impacts to Taylor Yards and the Cornfield site in Los Angeles. Many of the comments relating to Taylor Yards and the Cornfield site requested an extension of the comment period.

• Support for Castle Air Force Base as the HST station location and maintenance facility.

• Opposition to the CCT alignment option for HST service between Sacramento and Stockton.

• Opposition to conventional rail improvement tunneling options through Del Mar, and options with potential impacts to lagoons.

• Support and opposition for the UPRR alignment options between Fresno and Bakersfield (with a potential station at Visalia).

• Opposition to a potential HST station at Los Banos.

• Support for the Transbay Terminal as the Downtown San Francisco HST terminus.

• Concerns relating to the potential for the HST Alternative to induce growth.

• Questions about how the Program EIR/EIS address potential mitigation measures.

Additional Board Meetings

At various meetings after the issuance of the Draft Program EIR/EIS the governing board of the High Speed Rail Authority received status reports on the preparation of the Final Program EIR/EIS. At the meetings listed immediately below the Authority’s governing board received, discussed, and approved with some revisions, Authority staff recommendations on identifying preferred alignment and station options for the HST alternative in the Final Program EIR/EIS. Additional information concerning the Authority Board meetings may be found on the Authority’s website at www.cahighspeedrail.ca.gov.

September 22, 2004
November 10, 2004
December 15, 2004
January 26, 2005

Additional Agency Consultation and Outreach Activities

After the release of the Draft Program EIR/EIS, the FRA and Authority staff again consulted with other federal agencies, including the U.S. EPA and the U.S. Army Corps of Engineers. Additionally, the FRA consulted the President’s Council on Environmental Quality (CEQ) on procedures for further study of the broad corridor identified for the northern mountain crossing of the proposed HST system (see Chapter 6, San Jose to Merced—Northern Mountain Crossing). The CEQ concurred that the proposed approach would be consistent with NEPA and would provide for compliance with Section 404 of the Clean Water Act. (CEQ (Greczmiel) letter to FRA (Yachmetz), January 24, 2005.)

In addition the co-lead agencies again consulted with the California Department of Parks and Recreation, tribal representatives, representatives of various transportation agencies and local and regional government agencies, including: the Transbay Terminal Joint Powers Authority, BART, SAMTRANS, SCRRRA, SANDAG, OCTA, Riverside County Transportation Commission, the LACMTA, the Bay Area MTC, Sacramento Area COG, the Grassland Water District, the City of Palmdale, and numerous Cities and Counties in the Central Valley and elsewhere along potential alignments of the proposed HST system.

Also, following the release of the Draft Program EIR/EIS, the FRA and Authority Staff met with representatives of various groups and organizations, including the Sierra Club, the Planning and
Conservation League, the Natural Resources Defense Council, and the Train Riders Association of California (TRAC).
