WHAT IS THE BENEFIT OF DEVELOPING THE GATEWAY CITIES STRATEGIC TRANSPORTATION PLAN? WHAT IS IN IT FOR GATEWAY CITIES?

The Plan will foster regional coordination and collaboration among stakeholders, leading to reduced roadway congestion, improved air quality, a stronger economy and a better, healthier quality of life within the Gateway Cities.

FUNDING/FINANCING STRATEGIES:
- Identify Funding Sources
- Develop Cash Flow & Financing Model
- Target Funding and Financing Options

A detailed Finance Plan will be developed for projects in the Gateway Cities area, including a viable political strategy to position GCCOG high-priority projects for successful implementation.

ACHIEVE LOCAL GOALS
- Reduce Roadway Congestion
- Improve Air Quality & Health
- Strengthen Economy
- Improve Quality of Life

The purpose of the Gateway Cities Strategic Transportation Plan is to develop a unified, subregional multimodal transportation improvement strategy.

GATEWAY CITIES
Strategic Transportation Plan

Project Websites

Creating a world-class multimodal transportation system
All transportation modes will be studied together with a focus on demographic analysis, air quality and public health, storm water treatment, goods movement impacts, new technologies, and funding and financing strategies. The new tools with which to develop the Gateway Cities Strategic Transportation Plan include:

- 3-Tiered Multi-Resolution Model
- Air Quality Projection Model
- Transportation Technology Development
- Zero Emission Freight Corridor Development Study
- Funding/Financing Model & Strategies

Reduced roadway congestion, improved air quality, a stronger economy and a better, healthier quality of life within Gateway Cities will all result from this plan and regional coordination and collaboration between stakeholders.

- Integrate existing transportation plans & studies
- Refine project ideas & identify new projects
- Develop tools to analyze systemwide interactions
