

2021 GATEWAY CITIES ENERGY ACTION AWARDS

Gateway Cities Energy Action Awards (GCEAA) are designed to recognize cities for your actions to improve energy efficiency and sustainability and to provide motivation to continue your progress going forward.

The 2021 Awards are the first to recognize cities in the Gateway that are moving forward to meet and exceed their energy efficiency goals this year. Every Gateway City is eligible for an award based upon their progress in completing specific activities.

Cities have until November 15th to complete activities toward the Bronze, Silver and Gold Awards, which will be presented at the next Energy Working Group meeting on Tuesday, December 14th at 10 am.

To learn more about how to participate, [click here](#) to download the full description of the GCEAA program.

JOIN THE GATEWAY CITIES ENERGY WORKING GROUP

The Gateway Cities COG is pleased to host an active and informative networking group for all member cities interested in becoming more sustainable and energy efficient throughout their operations. The Gateway Cities Energy Working Group (EWG) brings cities together every

quarter with representatives of SoCal-REN, SoCal Gas and the Beacon Program to keep abreast of the latest developments and to access the many opportunities that each of these programs provides to support our cities. Equally important, it allows Gateway cities to network and to share your successes and experiences with each of these programs. Meetings are open to anyone interested in making your city more energy efficient, including Public Works, Planning, Water, Development Services, and Parks.

The EWG meets quarterly on the second Tuesday in March, June, September and December at 10 am. To view past agendas and presentations, and to register for the next EWG meeting, click [here](#).
